

Prediction Instructions

Install Required Packages

The GitHub repo includes a requirements.txt file with the following libraries:

- numpy==1.20.1
- pandas==1.2.3
- scikit-learn==0.24.1
- statsmodels==0.12.2
- xgboost==1.3.3
- lightgbm==3.1.1
- joblib==1.0.1

1. Either manually install the packages or use pip / conda to install the requirements.txt
2. Load project files
 - a) Either decompress saved files into a newly created project directory, or
 - b) Clone the github repository
 - i. <https://github.com/sysgenerated/CreditScoring>
3. Place required files in the same folder
 - a) predictions.py
 - b) saved_model.joblib
 - c) Input_data.csv
4. From the CLI enter "python scoring.py input_file.csv"
5. Review output
 - a) RMSE and Percent Accuracy will be output to the console
 - b) predictions will be saved to saved_scores.csv

Hardware Specs

OS: Linux Manjaro
CPU: Core i7-6700
RAM: 8GB
SSD: Samsung M.2

Estimated Memory / Runtime

Maximum memory usage: 1.2GB
Running time: 2.0 seconds
